Janlyn Rustila

has successfully completed the online Specialization

Introduction to Computer Programming with Visual Basic

This specialization is for anyone interested in learning more about computer programming including the fundamental computer science knowledge and skills required for work in this field. Through 4 courses in this specialization, you'll develop a foundation in the fundamentals of programming, including knowledge and skills essential for a career in information technology and data science. You'll use your own computer to install and configure Visual Basic, and after the course you'll be ready to continue working with your new Visual Basic skills!

LearnQuest

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
